

## **DATA GATHERING AT DELIVERY OF GOODS**

### **ABSTRACT OF THE DISCLOSURE**

Systems and methods for delivering goods and services from a provider to a receiver. The method includes placing an order for goods to the provider and providing the goods to a deliverer. The deliverer delivers the goods to the receiver. The deliverer then obtains at least one piece of data from the receiver at the time of delivery. The at least one piece of data is from a group comprising a credit card number, a debit card number, the information on the magnetic strip of a credit card, the information on the magnetic strip of a debit card, devices that store information that may be read by infra red, magnetic waves and/or radio waves, a check, a money order, a gift certificate, an electronic signature, and a copy of a piece of identification of the receiver. The at least one piece of data is then provided to a processor who handles payment to the provider.
